

GHK-Cu Copper Peptide: The Holy Grail of Healing

Dr. Loren Pickart discovered GHK and many of its biological effects with his original thesis is titled: "A TriPeptide From Human Serum" (June 1973)

GHK-Cu Copper Peptide activates your Stem Cells to repair and regenerate you, just like when you were younger!

GHK-Cu Copper Peptide is proven to **ACTIVATE** your stem cells, **PRODUCE** more stem cells, and **RESET** your stem cells to a younger healthier state.

Why is that important? Stem cells are the only cells in your body that are changeable. They have the unique ability to change into any cell your body needs for repair and regeneration, just like when you were younger.

Our cells are constantly wearing out, forcing our body to work around the clock to make new and healthy cells. Your activated younger stem cells turn those old cells young and healthy again! In fact, within 24 hours, GHK-Cu Copper Peptide resets 4,000 genes to a younger, healthier state.

As we age, we produce less and less stem cells, slowing down our body's ability to repair itself. By age 35 we have lost 50% of our stem cell activity. By age 65 we have lost almost all our stem cell activity. When we activate our body with these younger pluripotent stem cells, they are now ready to turn into whatever cell the body needs for repair.

Your new stem cell army is now activated! Even if you don't immediately feel the effects, rest assured your army of stem cells is now hard at work repairing your most critical issues first before moving on to something you do feel.

The Benefits of GHK-Cu Copper Peptide

SKIN & HAIR

- GHK tightens loose skin and thicken older skin
- GHK reduces fine lines and depth of wrinkles
- GHK increases hair growth and thickness
- GHK accelerates wound healing

LUNG PROTECTION

- GHK tops the list for chronic pulmonary issues
- GHK restores healthy function in lung cells
- GHK protects lung cells from damage

ANTI-FAST GROWING CELLS

- GHK tops the list to combat Fast Growing COLON cells
- GHK resets the PROGRAMMED CELL DEATH for aging cells
- GHK inhibites NFKB p65 which promotes fast growing cells
- GHK repaires damaged cells (47 genes up, 5 genes down)
- GHK resets 84 genes to inhibit fast growing cells

BRAIN & NERVES

- GHK resets human genes important to proper neuron function with 408 UP and 230 DOWN
- GHK induces strong Anti-Stress & Anti-Anger
- GHK induces Anti-Discomfort Activity
- GHK is being used for damaged spinal cords

ANTIOXIDANT POWER

- GHK increases SOD1
- GHK suppresses NFKB, a primary cause of aging
- GHK completely blocks oxidation

ACTIVATES STEM CELLS

- GHK causes adult Stem Cells to start producing again
- GHK produces more Stem Cells and resets Stem Cells to a younger, healthier state
